Faisal Sajjad
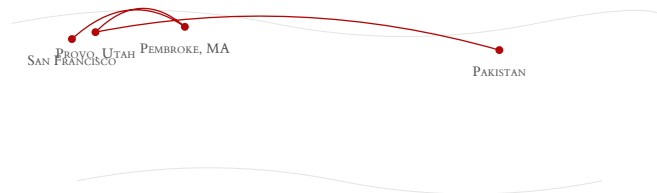

Site-Reliability & Cloud Leader

Career trajectory showing key milestones from humanitarian work to technical leadership

About

Engineering leader with over a decade of experience optimizing team output and building innovative solutions. Currently founding Do Little Lab, an AI-driven platform helping consumers contest healthcare insurance claim denials, while leading a 15-engineer team delivering state-tax software used by five U.S.

states. Passionate about leveraging technology for social impact—from healthcare accessibility to disaster relief.

Work

Selected projects and contributions

Do Little Lab
2024–Present · Founder

Conceived and launched AI-driven platform helping patients overturn insurance denials.

RSI
2019–Present · Engineering Manager

Lead 0-engineer team delivering state-tax software used by 0 U.S. states. Achieved 0% uptime improvement, 0% faster releases, and 0x database performance gains while scaling 10,000+ servers.

Namaazi
2023–Present · Founder & Core Developer

Solo-developed prayer-timing iOS app serving hundreds of active users.

New Horizon Flood Relief
2010–2010 · Founder

Organized humanitarian relief effort for Pakistan flood victims.

PROFESSIONAL NETWORK VISUALIZATION MAPPING CONNECTIONS ACROSS TECHNOLOGY AND LEADERSHIP DOMAINS

Skills & Interests

Technical: Swift, Python, JavaScript, TypeScript, C#, SQL

Languages: English (Native speaker), Arabic (Limited working proficiency), Urdu (Native speaker)

Causes: Civil Rights, Economic Empowerment, Education, Human Rights, Science & Technology

React   SwiftUI

Next.js   Node.js

SQL   Swift

C#   TypeScript   Python

JavaScript
